Subject: [External] Dominion Energy plans to raise monthly rates by 7.75%

Comment to the Docket:

- I would like to comment that Dominion energy should take into account the crushing effect this pandemic has had on families and customers. As an educator, we know that electricity is a necessity for students to be able to learn from home but also to have at night to read, complete school work and take care of basic necessities to be successful in school. Dominion should be ashamed of raising their rates during this time. I know their profit margins are not as high as they have been in the past but asking customers who are already struggling or unemployed to pay a higher rate will not increase their profits.
